Thermo-diagnostics Patient Test Preparations

- Come to the appointment wearing comfortable, loose fitting clothing that can be easily removed. Wear a long sleeved button-up shirt and long pants, even if the weather is hot or humid. Avoid synthetic fibers and tight clothing. Do not wear a bra or remove it at least 15 minutes prior to the test.
 - Do not shower or bathe the morning of the test. However, a quick shower using tepid water is allowable
 - Do not use body sprays, skin creams or lotions, or cosmetics the morning of the test.
 - Do not drink coffee, black tea, or caffeinated beverages, and do not smoke the morning of the test. A light breakfast is acceptable, but nothing piping hot.
 - Come to appointment hydrated; drink 12-16 ounces of water ½-2 hours before the test.
 - Do not exercise the morning of the test. This includes running, yoga, Pilates, etc.
 - Refrain from “regulative” and therapeutic practices within 36 hours prior to the test. This includes acupuncture, bio-energetic treatments, therapeutic massage, classical homeopathy, chiropractic treatments, etc.
 - Refrain from dentistry and dental cleanings at least 3 days prior to the test.
 - Women cannot be tested during the first or second day of their menstrual period. The lower abdominal points warm up and create false readings.
 - Arrive 15-20 minutes before your appointment so that your body has a chance to relax before you are tested.
 - Remove your glasses when you get to the office, as there are sinus points on the nose that will be tested.
 - Turn off cell phones during the appointment. Cell phones should be forbidden in the thermography room or should be turned off as electromagnetic radiation affects the nervous system.
 - Do Not drink alcohol for at least 24 hours prior to the test.
